Great Weekend

Holly Pic

Cool Gam "Status"

Include an option for scope (friends, fof, all public posts)

Could show last initial only?

Got a new kitten!

Dude Hey

This could be empty space or could separate text and picture posts
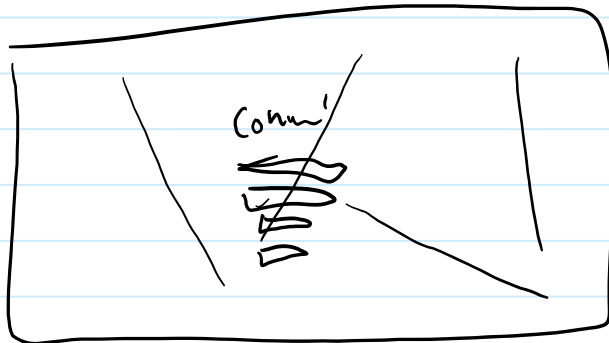

Click a post to view it

Hover Over "Edit profile"

Could go with light fun colors, as long is dif color from name

Connectify

Good dude "Hey"

Wow neat

Anon guy

Lame!

Same BG color to associate account/comment
Diff color from the previous

Angry Guy "F u"
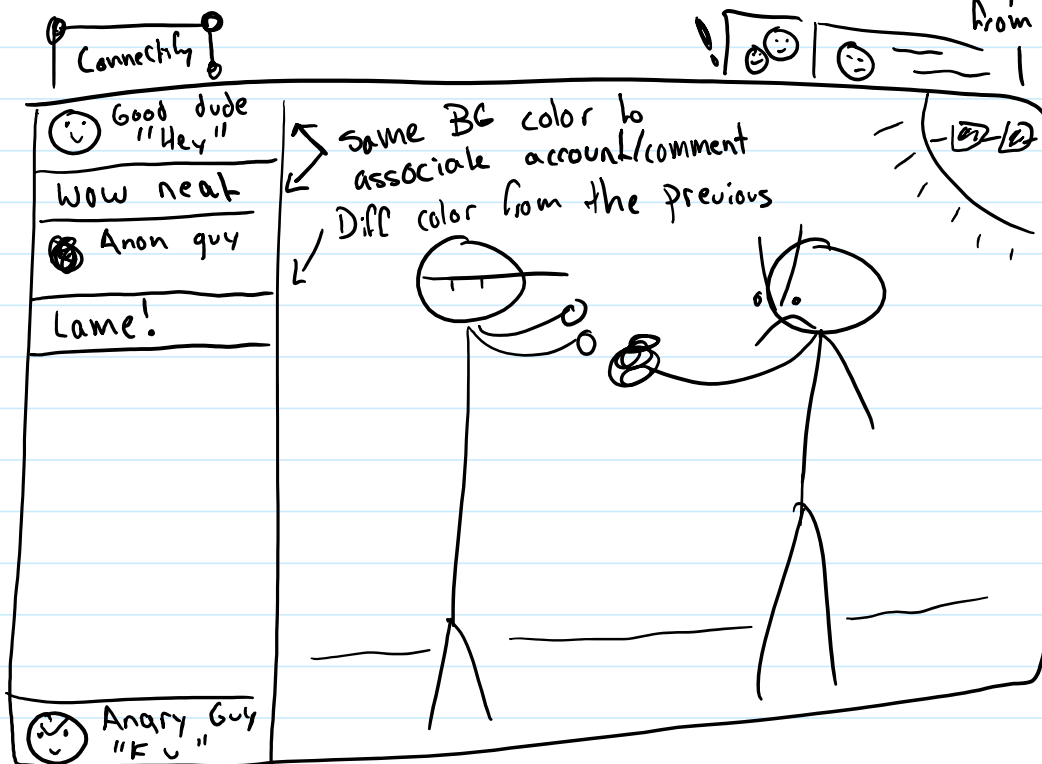

Server Admin Page

I don't think this needs to be fancy

Requests

Hi Guy   √   X

* Can delete followers, but they cannot see your stuff unless you let them?
Or followers go under public?

Different Privacy levels: No one, friends, fof, Public
each set containing the last

Following ^shouldn't be a requirement to see posts

The friend request button next to
the users card could take us to
an edit profile screen for the user
with the anchor tag #requests
or this could be a whole new page in general

author/edit#requests
or
author/edit/requests

Upload

In cool

Plain | MD

Plain text or Markdown
Can we detect this?
Or put a button?

Image [choose file]

Privacy [Friends ▽]

unlisted

Default option should
be here so it is
not tedious to click
every time

[Create]

upon click take us
do the created post
ensure backbutton doesn't let
the user spam/repost
